ABOUT ME

Student at the Technical University of Cluj-Napoca (Automatics), with hands-on experience across the full stack.

I scored a perfect 10 in both my Object-Oriented Programming (C#) and Systems Engineering in Programming (Java) exams, and studied algorithms and data structures in depth through my Algorithm Design course (C).

I built my personal portfolio website from scratch in Angular and TypeScript, have Python projects on my GitHub, and worked as Backend Developer in a 5-member agile team at the Polyhack Hackathon, engineering backend architecture in NestJS with a PostgreSQL database under tight deadlines.

My foundation covers OOP, SQL and relational databases, algorithms and data structures, plus REST API and HTTP fundamentals from real projects, alongside additional relevant coursework in these fields.

I hold a Google Cybersecurity Professional Certificate, am proficient with Git/GitHub, and have B2-level English proficiency (C1 spoken).

Motivated, adaptable, and eager to grow within a professional engineering team.

PROJECTS

[Current]

My Website A personal portfolio website from scratch utilizing Angular to effectively showcase professional experience, skills, and technical projects

Github Profile

Link: <https://github.com/Alexfery>

Blogger website Personal Blog Platform — Astro, React, TypeScript, Tailwind CSS

- Built a responsive, statically-generated blog (light/dark theme, reading-time estimates, category search/filter) using Astro with React islands for interactivity.
- Content is authored in Markdown through a Git-based CMS (Decap), so a non-technical user can publish and edit articles from a visual admin panel with no coding.
- Deployed on Netlify with continuous deployment from GitHub, a custom domain with automatic HTTPS, and an auto-emailing contact form.
- Architected a pluggable content layer that can switch between Markdown files and a Supabase database via configuration alone.
- The platform is production-ready and scheduled to go live in autumn 2026, pending only client-specific content and branding customization.

Photographer's Portfolio Photographer Portfolio Platform (React, TypeScript, Tailwind CSS, Java, Supabase, Cloudinary)

- Built a bilingual (DE/EN) portfolio website featuring an infinitely draggable photo canvas, searchable archive, dark mode; deployed on Vercel

- Designed a secure content pipeline: images served via Cloudinary with whitelisted transformations, metadata in Supabase Postgres with Row Level Security — the public site is strictly read-only, with no secrets in the browser
- Developed a Java Swing desktop admin tool for the client with batch uploads, editable metadata, automatic image compression (EXIF-aware) and least-privilege database access; packaged it with jpackage as a self-contained Windows app requiring no Java installation

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

VOLUNTEERING

[24/04/2026 – 25/04/2026] Cluj-Napoca

Polyhack Hackathon | Backend Developer

- Engineered backend architecture using NestJS, sharing core responsibilities with one other developer within a 5-member agile team.
- Delivered functional software under strict deadlines, demonstrating resilience and effective problem-solving in a high-pressure environment.
- Strengthened hands-on coding and system integration skills through rapid, collaborative prototyping.

[10/10/2020 – 12/10/2022] ALBA IULIA

XEO I was a member of my high school's robotics team, and we won first place in the FIRST LEGO League competition 28th of March 2021. • Responsible for the design and fabrication of mechanical modules adapted to competition challenges.

[10/10/2020] Ighiu

Children's Camp Counselor & English Teacher at Happy Faces Camp 1. At the camp, I learned how to overcome unexpected challenges, work in a team, and plan my tasks. 2. Served as a tour guide for large groups of children and parents at the Alba Carolina Fortress, learning strong responsibility and organizational skills. 3. Instructed children in various skills, developing strong public speaking abilities.

SKILLS

Linux / work as a team / Java (computer programming) / Typescript / C++ / C / PostgreSQL / Angular / Git / SQL / CSS / Python / HTML / understand spoken English / interact verbally in English / write English / understand written English / understand spoken German / Java

HOBBIES AND INTERESTS

Programming Since highschool I have found a great fascination about computers and how they work. That led me to try many programming languages and other technologies.

European languages and cultures [French & German] I am interested in learning the French and German languages and exploring their cultures. I am continuously improving my language skills and I enjoy discovering aspects such as history, traditions, and literature.
